

Project Description for Cyber Security Risk Management

Instructions:

- 1) The project must be completed by each participant. It is an individual project.**
- 2) Final deliverables should be prepared and submitted as instructed.**
- 3) All references used must be properly cited in the report. Plagiarism is strictly prohibited.**

Project deliverables:

- i) Each participant must submit a project report of 3 pages (10-point font size, Times New Roman, single-column format, single spacing). The deadline for the submission of the final project report is two weeks prior to the campus visit.
- ii) You will be asked to prepare a poster and/or present your project during the campus visit.

Project Topics: (Choose *any one*)

1. Develop a business plan that incorporates privacy/security as a competitive advantage.
2. Identify five (or more) core business activities of your organization. Develop the cyber threat narratives for each of these business activities.
3. Prepare a comprehensive privacy policy for your customers (data subjects).
4. Conduct a PIA for a product/service offered by your organization and present its results.
5. Conduct a cyber security risk assessment for an information system in your organization and present its results.
6. Imagine that you are the CISO of your organization. Imagine that your company is under a DDoS attack. How will your company be affected? How will you respond in this situation and manage the crisis?
