### Profile Summary:

- Certified Solution Architect with 10+ years of experience and Subject Matter Expert for Digital Workspace technologies **MEMCM, Azure Virtual Desktop, Autopilot, Autopatch, Microsoft Intune, Workspace One (AirWatch), Windows365, HPDM, Thin Scale, Workspace One, Azure Arc** with infrastructure knowledge including planning, design and implementation experience.
- Delivers measurable business value by providing core desktop technology solutions that meet business demand while realizing cost efficiencies. Works with our Line of Business partners to develop standardized, resilient operating environments and implement a global technology strategy for the firm.
- Strong Knowledge of Modern Device Management and Cloud (Cloud Mgmt Gateway, Co-management, Hybrid AD, Windows Migration, Cloud SOE Mgmt).
- Strong Knowledge on Endpoint Hardware & Environmental Testing, Wintel Administration with Active Directory & Device Policies, HPDM (For Thin Client Mgmt.), SmartDeploy, PDQ Deploy and Windows base services.
- Ability to deliver end to end Enterprise Project with high availability, responsiveness, and quality.
- Thorough exposure in managing multiple Geography's from Centrally – Includes US, UK, Europe, and South Africa.
- An energetic, self-motivated professional skilled and experience with various Endpoint technologies to drive business value from technical solutions.

### Technical Skills:

**MEMCM Administration**  
**Intune Administration**  
**Autopilot Administration**  
**Autopatch Administration**  
**Bitlocker Management**  
**Thin Scale Administration**  
**Workspace One**

**AVD Administration**  
**Cloud PC (W365) Administration**  
**Remote Imaging Administration**  
**Image deployment**  
**End User & Cloud Computing**  
**Cloud Patching (WufB)**  
**Passwordless (Windows Hello)**

**SOE management**  
**Windows Migration**  
**Patch Management**  
**Application packaging**  
**Thin Client Management**  
**Infrastructure Management**  
**Azure Arc**

### Professional Certifications:

- Generative AI Overview for Project Managers
- Microsoft 365 Certified: Enterprise Administrator Expert
- Endpoint Administrator Associate
- Security Engineering on AWS
- MS-500 "Microsoft 365 Security Administration"

- AWS Technical Essentials
- Microsoft Cloud Fundamentals: Administrating O365 and Intune
- Data Loss Prevention Endpoint Administration
- Linux System Administration, Shell Scripting and System Programming
- System Center Configuration Manager Administration

### Professional Contour:

EXL Services  
Sr. Manager

Apr'23 – Onwards

Manager

Nov'20 – Mar'23

My job responsibilities to plan and enablement of new capabilities toward Modern Device Management Journey along with Microsoft fast track team. It also includes standardization and automation of manual processes and providing solutions to reoccurring problems impacting several endpoints, Team Management, Driving Global Endpoint Projects end to end with 40k+ endpoints, Assessment of tools/hardware/service solutions for capability build-up for organization, working directly with GT Leadership to create value in endpoints & improve EUC experience.

### Projects Delivered (Self-Driven):

- Autopilot device provisioning
- AutoPatch (Cloud Patching)
- Co-management (Workload shifting)
- AVD enablement for business
- Windows 11 migration
- Passwordless (Windows Hello for Business)
- Azure Arc (Cloud patching for Server OS)
- Wufb Enablement for all Windows Endpoints
- Bitlocker enablement for all Windows Endpoints
- W365 enablement for same day user onboarding
- User Persona for application and policy deployment
- Group policy migration from AD to Intune (GPO Less)
- Thin Scale to enable ESS on the BYOD devices zero-day onboarding

### Projects Involved:

- Server migration from on-prim to Cloud (AWS)
- ServiceNow Implementation and help them to automate with custom inventory, self-service application deployment

### Key Responsibility:

- Planning, Designing, Implementation and Operation support for Enterprise Systems infrastructure and Enterprise Endpoint Management.
- Experience of Designing and Deployment for new on boarded project on Enterprise level in

secure and complex environment.

- Find the improvement scope from current running Enterprise Endpoint Services and implement to enhance Infra Security /Experience.
- Identify challenges in Enterprise Endpoint Services and work with MS Fast track team to implement solution/Fix.
- Working directly with SR Leadership w.r.t. improvement area and new implementation for Enterprise Endpoint Services.
- Pre-production assessment of tool/services either “Existing Service Upgrade” or “New Service / Feature Functionality” with negligible impact to EUE.
- Expertise in configuring & administering Intune, Autopilot, MDM policy.
- Expertise in configure and deploy MDM policy, Autopilot custom profile, WufB, Compliance Policy and conditional access.
- Extensive experience in the planning, designing, consulting, architecture solutions on Operating System deployment along with system center products like SCCM, Autopilot, Smart Deploy.
- Expertise in configuring & administering Azure Virtual Desktop, Windows 365.
- Experienced in Deployment of AVD and W365 as per customized business requirement and ensure to run ESS services.
- Expertise in Implementing, configuring & administering MEMCM CB, CMG, Bitlocker, Thin Scale.
- Experienced in SCCM software packaging and distribution, Patch management and operating system deployment (OSD).
- Handling and troubleshooting the OS level and application-level issues in endpoints.

Locuz Enterprise  
Senior SCCM Administrator

Dec 2017 – Nov 2020

- SCCM 2012 deployment and infrastructure knowledge including troubleshooting, design, and implementation experience.
- Customize and capture Golden image.
- Create and manage Task Sequences using SCCM/MDT for LTI and ZTI deployments.
- Image deployment on bare metal machines using SCCM Task Sequence.
- Experience in integration and enablement of CMG in production environment.
- Experience in creation and deployment of application/package via SCCM.
- Applications/packages creation and deployment in production environment via SCCM and web catalogue.
- Experience on installation & configuration of new SCCM servers (Primary Site, Secondary Site, and distribution point) in the environment.
- Experience in troubleshoot and maintain overall client and server health for entire SCCM infrastructure.
- Experience in to ensure to compliance of server in defined maintenance windows.
- Experience in installation & configuration of Thin Client infra HPDM server and connectivity.
- Experience to create and publish application on HP easy shell via KIOSK mode.

### Projects Delivered:

- Window 10 Migration

- CMG Implementation
- Smart deploy configuration
- Thin Client Infra configuration

Wipro InfoTech

Dec 2015 – Nov 2017

SCCM Administrator

- Experience in troubleshoot the issues while OSD deployment.
- Experience to create custom collection as per business requirement.
- Experience in customizing SCCM Task Sequence as per business requirement.
- Providing MBAM 2.5 infrastructure designing & implementation support to the end customer with details documentation.
- Experience in application creation and deployment.
- Providing global support for external facing devices/appliances vulnerability remediation activity.
- Experience in HP easy shell creation with KIOSK mode.
- Experience in SCCM Client troubleshooting and health check.
- Experience in creating custom compliance report.
- Experience in driver integration and deployment via SCCM.
- Responsible to monitor the SCCM health and activities.

InTarvo Technology Ltd

Sep 2014 –Dec2015

Trainee Engineer

- Performed management of internal IT infrastructure which include desktop and server infrastructure management.
- Provided assistance in operational problems related to desktop and applications to internal employees.
- Planning deployment and migration activities.
- Provided support to the end users for troubleshooting.
- Deploy application and package as per user requirement on devices.
- Monitor and share the status of application deployments and troubleshoot on failed machines.
- Monitor and close the daily task and remedy requests.
- Troubleshoot of Non-compliance machines to make them compliance.

#### Educational Qualifications

- B. Tech in Information Technology (2014)

#### Languages

- Hindi, English

#### Traits

- Forward-thinker, Self-driven, Positive mindset, Flexibility and Team player.
