Duration	December 2018 – 2019
Technologies used	SQL Server 2014,C#, MVC, Web Api, Entity Framework
Project overview	The Project Risk Management comprise of various modules that help to manage the software project of different Companies, Organization. This project will develop to support Multilanguages e,g Chinese.
Responsibilities	<ul style="list-style-type: none"> • Interacting with client/business in requirement gathering and clarifications • Preparing technical design document, technical approach and reviews. • technical delivery plan and sharing technical estimates to the PM • Leading the development team to deliver application/module as per project timelines. • Handling technical complexities and providing technical guidance to the team members. • Performing design and code reviews.

Project:	
Project	Workers Compensation Expert – Product
Client/Customer	SAF, USA
Role	Technical Lead (Team size 5)
Duration	Nov 2017 – Aug 2018

Technologies used	ASP.NET, C#, WCF, Javascript/jQuery and SQL Server 2008,SSRS for Reporting
Project overview	The WorkersCompExpert is based on an n-tier model that can be deployed as a traditional or SaaS (Software as a Service) license model. The design allows insurance carriers to sign up, configure and use the application. It allows the insurance carriers to personalize the look and feel of the application, setup permissions for the users and implement client-specific business logic. It also provides a level of control that allows the users to generate reports, e-mails and schedule batch processes
Responsibilities	<ul style="list-style-type: none"> • Interacting with client/business in requirement gathering and clarifications • Preparing technical design document, technical approach and reviews. • Preparing technical delivery plan and sharing technical estimates to the PM • Leading the development team to deliver application/module as per project timelines • Handling technical complexities and providing technical guidance to the team members. • Performing design and code reviews • Working on development, enhancements, Change requests and issues • Deployment, Documentation and status reporting

Project:

Project	Forms Configuration & Management
Client/Customer	Patriot National, USA
Role	Lead Developer (Team size 4)
Duration	Nov 2014- Aug 2017
Technologies used	ASP.NET, WCF, jQuery and SQL Server 2008
Project Overview	<p>The Forms Configuration & Management module supports NCCI forms as well as independent jurisdiction states and carrier specific forms. It consists of the following components:</p> <ul style="list-style-type: none"> - Forms Maintenance - An NCCI form contains textual information and data fields, which are pulled from the database. A bookmark is defined for each data field in the RTF document. Each bookmark is mapped to a corresponding data field in the WorkersCompExpert. The updated RTF document with bookmarks is uploaded into Document Management. User is also able to define whether the form should be generated for a jurisdiction state and/or application type (voluntary, assigned risk).
Responsibilities	<ul style="list-style-type: none"> • Worked as Individual Contributor in this project and involved in end to end activities from gathering the requirement to till the deployment of the application. • Preparing the Prototype for the Application • Database Design and management • Test Case Designing for User Acceptance Testing • Deploying the application

Project:

Project	PNI Reporting
Client/Customer	Patriot National, USA
Role	Lead Developer (Team size 4)
Duration	Oct 2008- Oct 2014

Technologies used	ASP.NET, WCF, jQuery and SQL Server 2008, SSRS for Reporting
Project Overview	<p>These reports are available from the Presentation Layer (UI) and user is able to generate them on-demand. The reports may be exported to different formats supported by SSRS such as pdf, excel etc.</p> <p>Online/On-demand reports may be called from the specific pages or from the Reports page. Reports generated from the specific pages display the same data as displayed on the pages.</p> <p>The Reports page provides the feature to schedule a report and specify parameter values to generate the report. In addition, the reports execution history may also be viewed from this page.</p>
Responsibilities	<ul style="list-style-type: none"> • Worked as Individual Contributor in this project and involved in end to end activities from gathering the requirement to till the deployment of the application. • Database Design and management • Test Case Designing for User Acceptance Testing • Deploying the report application
