PROFESSIONAL EXPERIENCE

Gabriel India Limited, Pune

Jan 2021-Present

Manufacturing Engineer

- Program planning and management, Single point of contact for all the automation projects implemented in Gabriel, right from floating out RFQ to giving DAP; from PDI, installations to clearing all the necessary paperwork for the project to go through Factory Acceptance test.
- Spearheaded an automation project for damper assembly which decreased cycle time of the process from 18 seconds to an impressive 9 seconds. The objective of the project of reducing the manpower to 2 from 9 was achieved. Automating the process brought-in efficient use of floorspace.
- Program Governance with timeline monitoring and escalations to stakeholders and CFT for timely execution.
- Implemented a manufacturing process quality improvement for cleaning piston rods oil holes in conjunction with vendor's expertise in building SPMs.
- Space Productivity (Six Sigma Green Bel Project) Study of Shop floor, V map making improving zig-zag material flow, layout change for better line balancing.
- Responsible to keep a check on critical manufacturing processes.
- Documentation of Process Failure Mode Effects Analysis (PFMEA) & carrying out process audits.
