Certificates

- ✓ Certification from Google - "Prepare Data for Exploration"
- ✓ Certification from Google - "Ask Questions to Make Data-Driven Decisions"
- ✓ Certification from Google - "Foundations: Data, Data, everywhere"
- ✓ Certificate from Tableau Software - Tableau Desktop I: Fundamentals
- ✓ Certificate from Tableau Software - Tableau Desktop II: Intermediate
- ✓ Certificate from Tableau Software - Tableau Desktop III: Advanced

Experience

➤ **Coforge Limited, Kolkata** **Jan-2023 to Till Date**

Project Title : Leadership Dashboard - for CEO & CIO
Client : Southern Water
Role : Technical Analyst

Working on Jira, Plan View, and ServiceNow data for tracking various stages of the projects, programs, and portfolios as a Technical Analyst in which we are using Power BI as a BI tool for creating the dashboard and multiple data sources like Azure SQL Server, Snowflake, SharePoint.

Job Responsibility: - coordinating various project teams and helping in Jira and plan view application configuration. Configuration and creating data pipeline for gathering data and creating power BI datasets. Applying rules for the incremental refresh & Preparing reports on various aspects of the user requirement and applying row-level security for the different levels of users of the organization.

Helping 2 other Power BI implementation projects as a team leader in which 13 Power BI developers are working. My responsibility is to understand the business requirements accordingly, define the BI process like data gathering process and stages, metadata finalization, data modeling, schema defining, incremental refresh configuration, workspace user access control, row-level security implementation, and ensure the best practices to be implemented for dashboard and smooth data flow from source to destination.

➤ **TCS, Bhubaneswar (Pay Roll of D.S INFOTECH PVT. LTD)** **Apr-2022 to Dec-2022**

Project Title : Retail Data Analysis
Client : Croma Retail
Role : Power BI Developer

Worked on an e-commerce project with the analytics team as a Senior Power BI developer in which my job responsibility was to understand the BRD after understanding the BRD creating metadata. Revalidating the metadata with a functional expert and data team. Once the metadata is finalized, start on dataset preparation as per the requirement of the client and consider the required field applying the incremental refresh on the dataset. From the Power BI desktop connecting to the live dataset for creating visualization and applying row-level security for the report.

➤ **BDO India LLP, Bhubaneswar**
Dec -2021 to Apr-2022

Project Title : Business Restructuring (E-Governance)
Client : OAICL, SCTE&VT
Role : Associate

Worked in a business restructuring team as a data analyst, coordinating with clients to collect information and analyze that information to convert it into a meaningful business requirement using Power BI, Tableau, and advanced Excel. Creating various types of dashboards and analytical report preparation in Tableau and Power BI as per client requirements. Data cleaning, interactive dashboard design, configuration of data load. Describing data analysis findings in business reports for better understanding.

➤ **3i-Infotech consultancy ltd., Bhubaneswar**
January-2016 – Dec-2021

Project Title : Project Management Unit (i3ms ERP)
Client : Directorate of Mines, Odisha
Role : Business Analyst

Worked as an executive in the field of Data Analysis and MIS reporting (Tableau and Power BI reporting & dashboard development) for the client Directorate of Mines, Odisha. Maintaining KPIs and designing dashboards on all types of mining activity. preparing reports/forecasting regularly.

Job Responsibility: - Coordinating with clients, circles offices, and back-end team for collecting information and representing that information into a meaningful business requirement after analyzing it. Coordinating & Managing Changes in the MIS database, streamlining MIS reports and processes. Understanding the data structure and determining data requirements for MIS reports, analytics, and design dashboards using BI tools. Reconciliation of Bank and Treasury accounts with ERP (i3MS) transactions.

Providing support in day-to-day activities to the project team, monitoring project schedules, preparing progress reports, and liaising with key stakeholders & managing lower-level administrative support staff, meeting deadlines, prioritizing assignments, and providing recommendations, supporting senior management as well as providing support to several managers simultaneously & preparing the report.

➤ **ISEE Staffing Solution Pvt Ltd.**
January 2015–July 2015

Project Title : AVL (Automatic Vehicle Location Tracking)
Client : GVK EMRI
Role : Co-ordinator

Worked as a project coordinator in the field of SQL SERVER Database (2008 R2), Excel, Team Management, and MIS reporting.

Job responsibility: - Working on SQL Server Database for extraction and updating data in the database. It Was a GIS project that used an Android device to locate the Ambulance location, speed & fuel info in the server of more than 1000 ambulance fleets, as a coordinator managed the team & moved various states within India as per the requirement of the client.
