Attained my graduation degree, as a Bachelor of Technology in Computer Science & Engineering.

A Note of Purpose

Greetings,

I am entirely aware of the job experience criterion, which is not fulfilled by me.

A future in Management is the prospect which excites me the most. Being a CSE graduate, Python and R programming language is my familiar ground. Besides my future endeavours in the field of Management, Data Analytics is my area of Interest, and I have pursued basic online courses in this subject.

Having a chance to gain valuable knowledge through distinguished IIM faculties is a matter of great pride, and I would be extremely committed to this assignment given an opportunity.
